

SmartGuard - Solutions™

DECON360

Cart Wash

- Disinfects 20 carts in less than 10 seconds
- At risk indoor/outdoor surfaces are protected when applying our approved EPA list "N" disinfectants to the equipment automatically when sensed by our advanced logic control system.
- Our recommended disinfecting agent is non-toxic, non-flammable and is alcohol-free. Long standing proven efficacy against viruses like H 1 N 1 SARS-Co-V-2, the virus that causes COVID-19, highly effective when applied virtually any surface including both hard and soft porous and non-porous surfaces.
- All Decon360 stations have been designed, developed, and engineered utilizing international compliant components, making it a true global solution.
- Decon360's high-efficiency nozzles deliver an unmatched 360° of surface protection on treated units, featuring particle sizes as low as 100 microns.
- Ideal for shopping malls, grocery and convenience stores, airport baggage carts and more. The tanks are reusable, holding refillable and consumable sanitizing agent features large capacity storage tanks for optimal performance.
- Our stations can be configured with additional units nested together to accommodate higher traffic volumes (located either side-by-side or end-to-end). Lightweight panels included for easy one-person assembly that have been designed for easy setup and tear-down, in as little as 5 minutes.
- Each kit comes partially assembled and ships economically falling within standard pallet dimensions. Tools and easy to follow instructions are included for problem free assembly.

Disinfects

Than 10 Seconds

Technical Specifications

PART NUMBER: DCS360C-AC for 120/240(VAC) -
DCS360C-DC for 12/24VDC

WEIGHT (DRY): 300lbs (two tanks, solution not included)

INSTALLED DIMENSIONS: 64"x 47.5"x 45.5"

SHIPPING WEIGHT: 340lbs (two tanks, solution not included)

SHIPPING DIMENSIONS: 70"x 55"x 55" (solution not included)

ASSEMBLY TIME: <1 hour for untrained personnel

SANITATION PROCESS TIME: <5 seconds

PASS THRU TIME: <5 seconds

POWER: 120/240VAC (12/24VDC options available)

POWER (INTERNATIONAL): Please specify destination country for proper plug configuration.

DISINFECTANT SOLUTION: EPA List N Registered and FDA Approved. Proven efficacy against SARS-COV-2 (COVID-19), OMRI listed and Ecologically advanced – No Wipe, No Rinse, No Residue. Non-alcohol, non-flammable, non-toxic and safe for skin and clothes when used per instructions. Non-staining and approved for contact with food containers, beverage tubing, and activated carbon water filters. Shelf life 18 months when unopened, 12 months once opened and properly stored.

Station meets FDA's IIE Guidance* to be used by public & healthcare providers to spray disinfectant antibacterial / virucidal solution onto hard surfaces and facilitate disinfecting a high volume of noncritical medical devices and equipment on site.

Arrange multiple units in parallel for very high traffic areas (turnstile arrangement).

Arrange multiple units in series to allow longer decontamination time in "hot spots", or in series with other devices to achieve desired effect (metal detector, explosives detectors (puffers), etc.).

Transportable by conventional forklift or pallet jack while packaged and assembled. Equipped with one pan drain for easy tear down and cleanup/storage.

Units are stackable for transport.

LIMITED WARRANTY: 1 year parts and labor for mechanical components; 3 years for hydraulic pump and fluid connector components All units include instruction manual and access to online documentation. We can assist you with your installation and support equipment based on your specific application to include carts and covers to suit your company's location specific needs. Contact your Sales Representative to find out more.
